

Basant

Full-Stack Software Developer

 Basant-spec |  in/Basant |  basantdhiman9@gmail.com |  +91-8813996371

SUMMARY

Dedicated Full-Stack Software Development Engineer with a strong background in developing innovative solutions for the banking and financial sector. Skilled in designing, implementing, and maintaining robust software applications to meet the complex needs of financial institutions. Experienced in the entire software development life-cycle, from concept to deployment, with a focus on delivering high-quality, scalable solutions.

Education

- **Indira Gandhi Open University, New Delhi** 2019 - 2023
Bachelor of Arts Percentage: 58
- **Board of School Education Haryana, Bhiwani** 2018
Class 12th Percentage: 90
- **Board of School Education Haryana, Bhiwani** 2016
Class 10th Percentage: 90

Technical Skills

Languages: Java, Javascript, SQL, HTML

Developer Tools: Visual Studio, VS Code, Git, Github

Frameworks/Libraries: SpringBoot Framework

Coursework: Data Structures & Algorithms, Object Oriented Programming, Database Management System, Software Development.

Other Skills: REST API

Soft Skills: Self-learning, Presentation, Adaptability, Communication, Teamwork, Problem-solving, Leadership, Time Management, Critical Thinking, Emotional Intelligence

WORK EXPERIENCE

- **Fresher**

PROJECTS

- **Shopping Backend Project**
Developed a robust backend for a shopping platform to handle product management, user authentication, and analytics.
 - Implemented endpoints for adding new products with necessary validations.
 - Designed scalable and optimized database models for efficient data management.
 - Built secure user authentication and authorization mechanisms for login and signup.
 - Created analytical endpoints to track and display sales, user behavior, and product trends.
 - Developed APIs for fetching product details for both buyers and sellers.
 - Designed functionality to safely delete products from the platform.

- **News App Backend**

Built a simple backend for a news app using a free REST API to display news articles, including the title and author.

- Integrated a free REST API to fetch real-time news articles.
- Developed endpoints to display news with details such as title, author, and publication date.
- Implemented a clean and simple API response handling to ensure smooth presentation of news data.
- Designed endpoints to retrieve and display the latest articles from different categories.
